

International Research Enrichment (IRE) Program

The International Research Enrichment (IRE) program is designed for students who are interested in pursuing a research career in science or broadening their exposure to research during their undergraduate studies. It emphasizes curiosity and grit, which are the essential attributes to a successful career in scientific research. Building upon the premise that exposure to international research environments at an early stage is essential to a fruitful research career, the program offers outstanding science students an early opportunity to nurture their research abilities and solidify their discipline-specific knowledge in regular Science programs.

Program Curriculum

The IRE program has a similar curriculum structure to the Science (Group A) and Science (Group B) programs, but it distinguishes itself from the regular science program by providing students with the following:

- Free choice of major programs among Biochemistry and Cell Biology, Biotechnology, Chemistry, Mathematics, Ocean Science and Technology, and Physics
- Admissions to the Undergraduate Research Opportunities Program (UROP)
- Exchange and internship opportunities in renowned foreign universities/research institutes
 - Summer research internship opportunity in foreign universities and institutions
 - Scholarship support for overseas learning trips

Additional requirement for IRE students	Credits
SCIE 1500 Guided Study on Research I	1
SCIE 2500 Guided Study on Research II	1
SCIE 3900 International Summer Research Experience	3
UROP 1000/1100 Undergraduate Research Opportunities Series	1
Additional Science 2000-level or above Electives	6
Total number of additional credits:	12

Program Highlights

- Tailor-made team building activities and field trips
- Participation in advanced research projects under the supervision of world-class professors
- Opportunities to meet with Nobel Laureates and renowned scientists
- Individualized Research Guidance and Mentoring from experienced faculty

The IRE program provides a nurturing environment to encourage students to interact among themselves and to delve deep into the subject(s) of their interests without limitations.

Incorporation of a foreign research element broadens students’ horizon in research skill development and fosters understanding of the relation between different research areas. This is essential for Hong Kong students because of the limited scope of research topics available in Hong Kong universities. The title “International Research Enrichment” emphasizes this aspect of the program.

An IRE student went on an overseas research internship at ETH Zurich in Switzerland

An IRE graduate pursues postgraduate studies at University of Pennsylvania in the US

Further Studies Opportunities

Building upon the premise that exposure to international research environments at an early stage is essential to a fruitful research career, the program offers outstanding science students the opportunity to nurture their research abilities and solidify their discipline-specific knowledge in regular science programs. Most of the graduates will pursue further studies in renowned universities worldwide.

Research Support Scholarships

- The following scholarships are available exclusively to support IRE students’ research activities:
1. Lee’s Pharmaceutical – Kanya Lee Scholarship
 2. H S Chau Foundation Overseas Research Grant for Young Women Scientists

Top-notice fundamental science research gearing towards paradigm shift

Overseas Summer Research Internship

Programme	2023 Summer Research Internship Host Institution	
BCB	Harvard, USA	NUS, Singapore
BIOT	Oxford, UK	
CHEM	Caltech, USA	UIUC, USA
	Scripps Research, USA	EPFL, Switzerland
MATH	Cornell, USA	Stony Brook, USA
	NUS, Singapore	ULB, Belgium
PHYS	UCLA, USA	Perimeter, Canada
	Stuttgart, Germany	CERN, Switzerland

Selected PhD Offers of the Class 2023

Institution	Research Area
Harvard University	Physics
Northwestern University	Mathematics
Northwestern University	Chemistry
Pennsylvania State University	Mathematics
University of Indiana	Mathematics
École Polytechnique Fédérale de Lausanne	Life Science
University of California, Santa Barbara	Physics
University of Michigan	Physics

Words from IRE Graduate

The International Research Enrichment program at HKUST gave me the chance to do hands-on research from the first year of my studies, and the flexibility to explore different areas of science before making a decision on which subject to pursue. The close-knit IRE community has also given me a circle of good friends who are pursuing the same goal. Also, the School of Science's exchange program and the IRE program overseas research internship has given me the opportunity to study and do full-time research in the United States, which proved to be an unforgettable experience and valuable learning opportunity.

Sonia CHOY

BSc in Mathematics (International Research Enrichment Track), Class of 2023

Admissions Requirements

Students can apply for the IRE program through direct choice in JUPAS / Non-JUPAS admissions scheme, or apply for transfer from the regular Science (Group A) program or Science (Group B) program of the School of Science into IRE program after their first year of study. Students interested in IRE program are encouraged to include both *IRE program (JS5101)* and either *Science (Group A) program (JS5102)* or *Science (Group B) (JS5103)* in their JUPAS / Non-JUPAS program choices.

JUPAS

Program-based
Entry (JS5101)

HKDSE applicants with one of:

M1 / M2 / Biology / Chemistry /
Physics

Non-JUPAS

Applicants with international
qualifications (**IBDP, GCEAL, SAT**, etc.) with one senior level
subject from: **Biology /
Chemistry / Mathematics /
Physics**
